Response to 1 thru 4. I copy the following words from the Provincial Govt. : "must remain focused on student achievement and provide safe, respectful learning environments. School board trustees have an important responsibility to ensure that every child can come to school feeling safe, welcome and able to learn and grow."

Common Sense dictates that applies to everyone equally. When anyone steps outside these standards it should be reported. To the Government and to the Communities requesting reporting of these situations. All violent situations are reported by individual boards to the Government. One assumes there is something done with these incident reports by the Government. Specific incidents directed at a particular group could be reported to an organization representing that group. it follows that the Jewish Community could request those stats, and the responses to those situations.

On a general note on antisemitism or discrimination against any group. It is wrong and not productive and open discussion may help to reveal the truth.

The other "solution" could be that politics cannot be discussed in the classroom, but we are beyond that as a viable solution. Because the Jewish Community is specifically targeted and antisemitism has long been practiced, and recognized as wrong, that community should be able to suggest special handling of those situations and reporting of the numbers, and what is being done about them. I recognize that this is a complex problem and a short answer may not be sufficient. Continue your efforts to keep this in the public eye, and to suggest solutions.
